“GEARED GREEN”

IN THE FIELD

- Working with owners to create energy efficient designs on our design build projects
- Use of energy efficient products on our jobs
 - Lighting, including LED bollards and lighting fixtures
 - Solid State Motor Controls
 - VFDs (Variable Frequency Drives)
- Use of photoeyes and occupancy sensors on jobs to increase energy efficiency
- Use of “kit” purchasing
 - Packing “kits” of materials from multiple suppliers together to be delivered to jobsites
 - Limits packaging
 - Limits fuel usage
- Recycling program
 - Copper
 - Steel
 - Paper
 - Aluminum
 - Used electrical gear
- Employee carpooling
 - To and from jobsites, meetings, seminars etc.
- Limiting paper usage by utilizing e-mail, SharePoint (internal company website) and Electronic documents

THROUGH OUR SUPPLIERS

- Building relationships with environmentally aware companies
- Limiting the number of suppliers per job
- Using as many local suppliers as possible
- Packing “kits” of materials from multiple suppliers together to be delivered to jobsites
 - Limits packaging
 - Limits fuel usage
- Encouraging supplier’s usage of “green” practices such as the use of flex-fuel fleet vehicles, etc.
